Professional Summary

Computer Science undergraduate and aspiring Software Engineer with hands-on experience building full-stack web applications, mobile apps, and scalable software systems. Proficient in Data Structures and Algorithms, Object-Oriented Programming, and RESTful API development. Seeking high-impact Software Development Engineer (SDE) and Full-Stack roles.

Technical Skills

Languages: Java, C, Python, JavaScript, HTML5, SQL
Frameworks & Libraries: ReactJS, React Native, NodeJS, ExpressJS, Flask, NumPy, Pandas, MongoDB
Developer Tools: Git, GitHub, Postman, VS Code, Visual Studio, Jupyter Notebook, Google Colab, IntelliJ IDEA
Core Competencies: Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), RESTful APIs

Projects

Smart AI Assistant *(GitHub)* *Jan 2026*
HTML, Java, Canvas API, Ollama

- Engineered a vector-based search engine using HNSW, KD-Tree, and brute-force algorithms to optimize data retrieval efficiency.
- Architected a modular backend design separating training, inference, and API layers to enhance code maintainability and scalability.
- Developed an interactive user interface featuring real-time query visualization and sub-second response latency.

WanderLust — Trip Finder *(GitHub)* *Oct 2025*
HTML/CSS, JavaScript, NodeJS, ExpressJS, Mapbox, MongoDB

- Developed a full-stack MVC travel planning platform featuring dynamic maps and custom location-based user interactions.
- Integrated Mapbox APIs for advanced geolocation tracking, spatial data querying, and custom route visualization.
- Engineered secure RESTful backend services using ExpressJS and MongoDB for scalable data management.

Experience

Software Intern — boAt R&D *Sep 2026 – Present*
Mobile Application Development — React Native, Android

- Developing cross-platform mobile application features utilizing React Native, JavaScript, and native Android SDKs.
- Implementing real-time audio processing and speaker identification functionalities tailored for target Android environments.
- Leveraging Android microphone APIs and on-device processing workflows to efficiently capture and analyze speech data.

Web Developer — Internship Studio *Feb 2025 – Mar 2025*
SharePlate — Food Sharing Platform | HTML/CSS, JavaScript, ReactJS, ExpressJS, EJS, MongoDB

- Designed and launched a full-stack food donation web platform supporting multi-role user authentication and interactions.
- Developed robust RESTful APIs and optimized MongoDB database schemas capable of managing 500+ live records seamlessly.
- Improved UI responsiveness and frontend asset loading pipelines, reducing overall page load time by 35%.

Certifications

Prompt Engineering for ChatGPT

- Designed structured, context-driven prompt architectures to significantly enhance AI response accuracy and output consistency.
- Applied advanced role-based modeling and constraint-based techniques to optimize workflow automation.

Education

Kalinga Institute of Industrial Technology *2022 – 2026*
B.Tech in Computer Science and Engineering (CGPA: 7.83)

Jesus And Mary Academy *2020 – 2021*
12th Board CBSE (Percentage: 78%)

Jesus And Mary Academy *2019 – 2020*
10th Board CBSE (Percentage: 87%)

Achievements

- LeetCode: Successfully solved 200+ algorithmic problems covering core Data Structures and Algorithms (DSA).
- Earned continuous problem-solving milestone awards, including the official 50 Days Coding Badge.
